JSC AVEPLAST ENVIRONMENTAL PROTECTION POLICY

JSC Aveplast is one of few window manufacturing companies offering the highest quality plastic and aluminum windows, doors, facades and conservatories, as well as providing installation and maintenance services.

Understanding the importance of environmental protection has led JSC Aveplast to accept the responsibility of our impact on the environment and ensure:

- Continuous development, implementation, maintenance and improvement of the environmental management system in accordance with the requirements of the international standard ISO 14001.
- Comply legal requirements related to the company's environmental aspects and the requirements adopted by the company.
- Strive for improvement of environmental efficiency and adherence to the principle of pollution prevention.
- Use natural resources efficiently.
- Save electricity by implementing advanced technologies.
- Periodically evaluate the results of environmental performance.
- Set annual environmental targets and allocate the necessary resources to achieve it.
- Inform the public and our stakeholders about company's environmental policy.
